DETAILED ACTION

Election/Restriction

1. Applicant's election without traverse of Group II, claims 35-78 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 35 is rejected under 35 U.S.C. 102(b) as being anticipated by Andideh et al. (US 6,362,091).

Andideh et al. discloses a method of making an integrated circuit, the integrated circuit including a composite dielectric layer having a first silane-containing layer (102) (col.3 lines 60-65), a second silane-containing layer (104) (col.4 lines 20-25), and a low dielectric constant polymer layer (103) (col.3 lines 5-10 and col.4 lines 6-8) disposed between the first and second silane-containing layers, the method comprising:

Art Unit: 2811

depositing the first silane-containing layer on the substrate; depositing the low dielectric constant polymer layer on the first silane-containing layer; and depositing the second silane-containing layer on the low dielectric constant polymer layer. See Fig. 1a to Fig. 1c.

Allowable Subject Matter

3. Claims 54-78 are allowed.
4. Claims 36-53 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is an examiner's statement of reasons for allowance: Andideh et al. appears to be the closest prior art reference. However, this reference fails to teach all the step as claimed in claims 36-78. Prior art of record fails to teach or suggest to incorporate these limitations into Andideh et al. to arrive at the claimed device.
